Make the SMART move to an INTELLIGENT switch!

BEFORE...

**Sometimes
more pieces
isn't better**

This is one of those times.

...AFTER

Powered Aire Inc., a leader in air curtain technology, introduces its latest innovation - the **Auto-PILOT** digital logic controller, which performs the functions of multiple mechanical controls and then some.

The **Auto-PILOT** features a user-friendly touchpad that is factory programmed to implement the following air curtain options and operations:

- Activation
- Fan On/Off/Auto
- Speed Control
- Heat On/Off/Auto
- Space Heater Operation
- Thermostat Set Point
- Time Delay
- Time Schedule Operation
- Time and Date Display
- Temperature Display
- Key Code Lockout Option
- Mode Indicators

The **Auto-PILOT** provides aesthetic flexibility by negating the need for unsightly controls and constant maintenance. It fits into a regular electrical wall-mount outlet which allows for convenient installation at ANY chosen location.

Only an Ethernet cable is needed for function of the 2.8-inch High Speed Touchscreen HMI Controller with high resolution LCD color screen. The **Auto-PILOT** package includes the Touchscreen, Programmable Logic Controller (PLC), DC power supply and PoE DC Injector. If operating as a thermostat a remote temperature sensor is supplied as well.
