Your Source For Information on Aire Curtains

Don't get blown away by hidden costs

Some manufacturers sell air curtains that are not fully assembled, or require parts that are priced separately from the basic air curtain cost. This is okay, if clients don't mind spending more money and time on installation. But in most cases, the priority is getting the air curtain up and running as quickly and as cost effectively as possible.

All aire curtains furnished are **complete factory assembled units** as manufactured by Powered Aire Inc., Greenville, Pa.

Powered Aire Curtains

1. Are fully assembled when shipped.
2. Require no control panel for commercial units
3. No additional cost for control panel when required for industrial models.
4. All of our units have both top and rear mounting holes for ease of installation.

Other Manufacturers' Air Curtains

1. May ship as separate components, such as case and motor/fan assembly.
2. Require a separate control panel for their units.
3. Require a separate cost for control panels.
4. May require a separate bracket for top mounting.

NONE of the above!
