

Control switches

Commercial Applications

Decorator Switches- For remote mounting, these switches promote an attractive installation for any of Powered Aire's exposed or above the ceiling models.

Variable Speed Selector Switch- Directly varies the speed of a Mini Power air curtain or turns the unit off. Can be used with 120 and 208/240 motors only.

Auto-PILOT™

AUTOmated P rogrammable I ntelligent LCD-O perated T ouchscreen

The Auto-PILOT™ features a remote-mounted, user-friendly touchpad that is factory programmed to implement the following air curtain options and operations:

- Activation
- Fan On/Off/Auto
- Speed Control
- Heat On/Off/Auto
- Space Heater Operation
- Thermostat Set Point
- Time Delay
- Time Schedule Operation
- Time and Date Display
- Temperature Display
- Key Code Lockout Option
- Mode Indicators

Industrial Applications

High/Off/Low Selector Switch- Switches between the high and low speeds or turns the air curtain off.

Heat On/Off Selector Switch- Turns the electric heat on and off while the fans are running, or when used in conjunction with a thermostat can disable the heat.

On/Off Selector Switch - Switches the air curtain on and off.

High/Off/Low Selector Switch- Switches between the high and low speeds or turns the air curtain off.

Hand/Off/Auto Selector Switch- Switches between the unit running constantly in the hand position, off, and auto, which only runs when the door switch is activated.

Heat On/Off Selector Switch- Turns the electric heat on and off while the fans are running, or when used in conjunction with a thermostat can disable the heat.
