

Control Options: Switches

COMMERCIAL APPLICATIONS

- A Decorator Switches**
For remote mounting, these switches promote an attractive installation for any of Powered Aire's exposed or above the ceiling models.
- B Variable Speed Selector Switch**
Directly varies the speed of a Mini Power air curtain or turns the unit off. Can be used with 120 and 208/240 motors only.

INDUSTRIAL APPLICATIONS

- C ON / OFF Selector Switch**
Switches the air curtain on and off.
- D HIGH / OFF / LOW Selector Switch**
Switches between the high and low speeds or turns the air curtain off.
- Heat ON / OFF Selector Switch**
Turns the electric heat on and off while the fans are running, or when used in conjunction with a thermostat can disable the heat.
- E HIGH / OFF / LOW Selector Switch**
Switches between the high and low speeds or turns the air curtain off.
- HAND / OFF / AUTO Selector Switch**
Switches between the unit running constantly in the hand position, off, and auto, which only runs when the door switch is activated.
- Heat ON / OFF Selector Switch**
Turns the electric heat on and off while the fans are running, or when used in conjunction with a thermostat can disable the heat.

3.5"H x 2.5"D x 2.78"W

5"H x 2.5"D x 2.78"W

6"H x 2.5"D x 2.78"W

POTENTIOMETER

- F Eco-Motor™ Control**
Varies the speed of the Eco-Motor from 50% to 100% for models ECE and ECC air curtains.

PROGRAMMABLE

- G AutoPILOT™ Programmable Switch**
Remote-mounted, user-friendly intelligent touchpad that is factory programmed to implement up to 12 functions and options that would normally require mechanical controls.
