

AN AIR CURTAIN FOR THE NEXT REVOLUTION

Meet the REV from Powered Aire, a custom-built air curtain for revolving door applications. The REV blends seamlessly with revolving doors to match their size and color while providing all the benefits of an air curtain.

The REVIEW:

- Available in Stainless Steel, Black or White Powder coat or color-matched to the revolving door or building's interior
- Heated units can run continuously to provide secondary heat or synchronized to run when door is in motion
- High Efficiency Plenum and nozzle design for maximum uniformity and lowest noise levels
- Designed and customizable to help ensure proper fit into most revolving door applications
- Can be used on manual or automatic revolving doors
- Heavy duty 1/2 HP motors capable of 1075 RPMs
