

CLD

CLD-E

LIGHT DUTY

ABOVE CEILING

The Chameleon Light Duty (CLD) is specifically designed to be dropped into the ceiling above customer entry ways where a standard air curtain cannot be exposed. Like the CED, the Chameleon also has the least objectionable airflow.

OPTIONS

ELECTRIC HEAT

Electric CLD-E
Hot Water pg 83
Steam pg 83

FILTER

½" Cleanable

CUSTOM GRILLES

The white grille is standard with this model.
Consult factory for custom color or metal.

AT A GLANCE

Single Incremental Widths

3' to 12'

Max Installation Height

11'

Heavy Duty Motors

½ HP

KEY DESIGN FEATURES

- White decorative intake grille with hinged access panel (consult factory for custom finishes)
- 1/2 HP ODP (Open Drip Proof) direct-drive dual-speed motor(s)
- High-efficiency discharge plenum with adjustable air foil vane (+/-20°)
- **Electric Only:** Factory mounted single-stage electric heaters
- **Electric Only:** Single point power connection available (see electrical table)
- **Electric Only:** Alternate heater kW available (consult factory)

RECOMMENDED CONTROLS & ACCESSORIES

- Activation by 24V magnetic door switch
- Toggle disconnect switch
- SmartTouch Lite or Pro controller
- Filter (washable)

Performance Highlight

Heating elements are mounted inside the plenum, on the discharge side of the blowers. Here, heat won't affect motor life and the heaters are protected from dust that would accumulate on them if they were mounted on the air intake.

► CLD, CLD-E, CLD-HW/ST | INSTALLATION

! IMPORTANT

- ✓ Trained and experienced mechanic / electrician required.
- ✓ **WARNING:**
Risk of electrical shock, can cause injury or death: Disconnect all remote electrical supplies before servicing.
- ✓ Units must be field wired in accordance with all applicable local, state, provincial and national codes, including wire size and materials.
- ✓ All hardware and brackets must be of sufficient strength to safely support air curtain.

✍ NOTE

For every one inch the bottom of the air curtain is mounted above the door header, the back side of the air curtain should be moved away from the wall $\frac{1}{4}$ inch.

Unit has four 15/32 inch holes for installing one end of 7/16" threaded rods. The other ends of the threaded rods can be attached to the ceiling. Washers and lock washers or locknuts are recommended. Mounting structure should be of sufficient strength to hold air curtain, and hardware (supplied by others) should be of sufficient strength and quality to support the unit safely.

STEP 1

Remove intake/discharge grille from bottom of air curtain. If ceiling is already in place, determine where air curtain location will be and cut a rectangular hole in the ceiling. The hole will be 1 inch longer and wider than the bottom length and width of the air curtain without the intake/discharge grille.

STEP 2

Suspend air curtain using threaded rods so that the bottom of the unit is centered within the cut out in the ceiling. There will be a 1/2 inch gap around the air curtain. Mount the unit so that the bottom is flush with the ceiling.

STEP 3

Attach the intake/discharge grille to the bottom of the air curtain. The grille is larger than the air curtain to cover the gaps between the air curtain and ceiling.
