

# EVE

LOW PROFILE

Powered Aire's Elite Vestibule Exception, EVE, was developed to be used as an exception to vestibules. The unit has met all criteria per various codes and has been tested in accordance with the ANSI/AMCA 220 standard. The EVE merges aesthetics and performance into a fashionable, low-profile air curtain designed for front-entry applications. The EVE offers a stylish intake and a curved, contemporary silhouette. Available in brushed stainless steel, white powder coat or black powder coat, the EVE blends into a building's architectural design and layout while effectively creating a barrier that separates indoor and outdoor environments.
